Larry Ashcraft had his best high-school physics class in years in 1990-1991 - all but three of them were taking high-school calculus also. His physics class scored 17% higher than the North Carolina state achievement average! Larry has made excellent "Hunter and Monkey" demonstrations and gave one of them to us at SC. We use it in General Physics class each year. And he bikes the Blue Ridge Park-way.

Orville Bignall has passed his proficiency examination at FSU. He and Suzie had their second child, Elissia Nenitia-Ann.

CiarenceBlue works for the Bayer Corporation, at one of its massive installations in Dormagen, Germany.

Keith Bowen has published his third article on the effects of vision defects on astronomical observing.

Doug Bredahi has completed the Appalachian Trail!

George and Mary Bogovich celebrated their 50th wedding anniversary, but very soon thereafter George passed away.

Gary Bradley (1990) is teaching high school in Georgia. First reaction -- the students are not very motivated to learn. Now it's going better.

Ken Caviness has joined the physics and mathematics departments at Southwestern Adventist College.

Marilyn Crooker continues to be very active in community activities such as MADD, Save the Guntersville Bridge, National Victims (of Crime) Center, and

Alabama Network of Victims Services.

Earl Cornwell passed his qualifier exams in September.

Rande Dager has left private enterprise and is back in secondary school teaching. Before he made the decision to leave business, Rande received no responses to 45 letters about positions; after making the decision, a year later, he received 13 firm calls in response to seven letters!

Ed Dininger earned his masters in Educational Administrations and also was awarded the Zapara Award for excellence in teaching.

Ronald Fox celebrated his 50th birthday by running up the Never-No-Summer Range (in the Rockies), starting at 9000 feet and exceeding 14000 feet in spite of a thunderstorm and poor trail markings.

David Gentry is collaborating with his father R.V. Gentry on research about the history of the earth.

David Gimbel has left the business world and has joined the Air Force.

Penny (Duerksen) Hughes is pursuing a lengthy post-doctoral program in immuno-logy at Emery University Medical School.

Brian Hartman (pre-engineering graduate, 1990) has begun his biology and bio engineering studies at Walla Walla College.

Alicia Harper has married Jon Nash (see below), and works at an environmental testing laboratory in Fort Collins, Colorado.

John Henson has completed two residencies and is involved with molecular biology studies of neuro-oncology at Boston General Hospital.

Cliff Keller has joined the faculty at West Indies College. His book on unique mechanics problems, written with Professor Wang Yimin (of China), is now in print.

Mickey Kutzner has commenced an active program of undergraduate research at Andrews University (photoionization calculations).

Jon Nash (1990) has commenced graduate study at Colorado State University, where Chris Hansen is also. He and Alicia Harper were married in May of 1990.

James Robertson, just graduated and now beginning graduate studies at FSU, presented a paper at the International Conference in Quantum Chemistry at Menton, France, in July of 1991.

Mike Seaman has earned his EdD and is Assistant Professor of Educational Research at the University of South Carolina. -

Vincent Tan works as a Laboratory Technology Specialist in Chattanooga.

Ken Shaw has joined the faculty of the department of mathematics education at Florida State University (Panama City) and is involved in a very active group of researchers.

Kevin and Dee (Giles) Toppenberg have both begun medical training at Loma Linda Medical Center. He was graduated in Chemistry in 1990, and Dee in Biology in 1991; Kevin was active in our physics research program.

Carol and Carroll Wheeler completed their teaching in Guam, fished for salmon in Alaska, and hedge-hopped in their airplane to Wisconsin, South Carolina, Loma Linda, Wisconsin, South Carolina, Florida, Wisconsin, and (at last report) somewhere near Tennessee.

David Wheeler has a 507-bird list (as of March 1991).
